views.py:42
Identified syntax error in views.py and planned fix
I see the issue! There's a syntax error in the start_quiz() function definition on line 6. The parameter is corrupted – it says python [manage.py](http://_vscodecontentref_/1) runserver instead of request .
Let me fix that:
Updated views.py
Fixed! The function parameter is now correct (request instead of the corrupted text).
Try running the server again:
Edited views.py +1 -1
Then visit http://127.0.0.1:8000/quiz/ to start the quiz.
please solve this error
views.py:42
Reviewed views.py and considered running the server
